SUMMARY

I design **AI products** and ship them with AI; the thinking stays mine. **6+ years** of product design across **B2B SaaS, enterprise platforms and consumer apps** used on 500,000+ devices, most of it as the only designer on the product. I work end to end: research with real users, flows, **design systems** and prototypes, then **production code** written with AI coding tools and shipped as pull requests that engineers review. Complex, multi-step enterprise workflows are where I do my best work.

EXPERIENCE

Senior UX Designer · [Lyearn](#)

March 2025 – Present

AI-native B2B HR SaaS platform; sole designer across 5 product modules and the design system

- **AI Productivity Insights (Performance):** Shaped an AI performance module that sets each employee's mindset, goals, skills and activities, scores them from tools like **Slack, Gmail, HubSpot**, and gives AI advice. **500+** in pilot.
- **AI Course Creator (LMS):** Created an AI course builder that turns a prompt and company documents into a full course with lessons and quizzes, held for review before publishing. Creation time **dropped 30%**.
- **Design System (Figma to React):** Built the token-based design system behind every module, with Figma and React on one component library so **AI coding agents** build screens from it. Build time **fell 40%**; I ship my own PRs.
- **Positions (HRMS):** Owned the HRMS module where HR plans people against **job profiles**, creates positions, adds or removes people, and keeps a history of every change, so day-to-day HR work gets easier.
- **AI Career Paths (Talent):** Conceived a new talent module where AI builds a ladder for every role from its job profile, so employees see where they stand and what comes next, and managers spot gaps.
- **AI Knowledge Base (Knowledge Management):** Designed a knowledge platform that takes in documents in bulk, organises them with AI, and lets employees search or explore them as mind maps.

Senior UI/UX Designer (promoted from UI/UX Designer) · [Qubo](#)

June 2023 – March 2025

Smart home and dashcam apps, fast-paced product team

- Led the redesign of the **Qubo Pro app**. Rebuilt setup, video access and downloads after research with real users, tested with **300+ beta users**, and improved device connection success.
- Redesigned the smart home app's playback and device onboarding flows for iOS and Android (**500,000+ devices**). Playback complaints **fell 20%** and onboarding issues **fell 30%**.

Product Designer (promoted from Intern) · [Nickelfox Technologies](#)

May 2021 – June 2023

Product design agency, startup clients

- Designed SaaS platforms, dashboards and mobile apps for healthcare, fintech, e-commerce and hospitality clients, and presented the work to founders and client teams.
- Redesigned the Nickelfox Technologies website. Qualified inbound enquiries **went up 20%**.

UI/UX Designer · [OriginBluy](#)

June 2020 – April 2021

Employee engagement app

- Redesigned the TWChallenge app using habit and gamification principles (Hooked model, Octalysis framework) to get people walking more. App drop-off **fell 30%**.

SKILLS

AI and design to development	AI product design, AI-assisted design workflows, Figma-to-React, Design systems, Design tokens, Component libraries, Prompt engineering, Prototyping in code, Design QA, GitHub PR workflows
Product design	B2B SaaS, Enterprise UX, Mobile app design (iOS, Android), Web application design, User-centred design, Interaction design, Information architecture, Wireframing, Prototyping, High-fidelity UI, Visual design, Accessibility (WCAG), Responsive and adaptive design, Apple Human Interface Guidelines, Material Design
Research and validation	User research, User interviews, Usability testing, Journey mapping, Research synthesis, Heuristic evaluation, Data-driven design, Competitive analysis
Strategy and collaboration	Product strategy, Product discovery, Cross-functional collaboration, Stakeholder presentations, Design reviews, Design system governance, Mentoring, Agile sprint delivery
Tools	Figma, FigJam, Claude Code, Cursor, GitHub, Storybook, Framer, Adobe Creative Suite, HTML, CSS, React

EDUCATION

Bachelor of Technology in Mechanical Engineering	2015 – 2019
Manav Rachna International Institute of Research and Studies, Faridabad, India
